

Mockito Hands-On Exercises

Exercise 2: Verifying Interactions

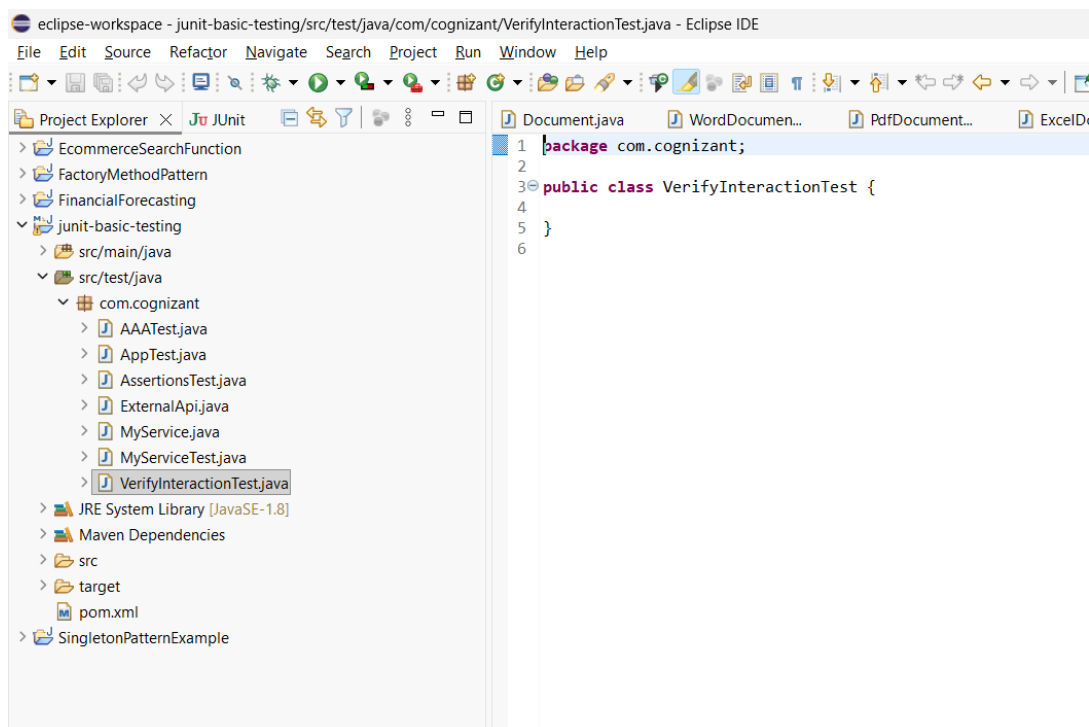

Step 1: Open Existing Maven Project

Opened the existing junit-basic-testing Maven project in Eclipse IDE.

Step 2: Create VerifyInteractionTest Class

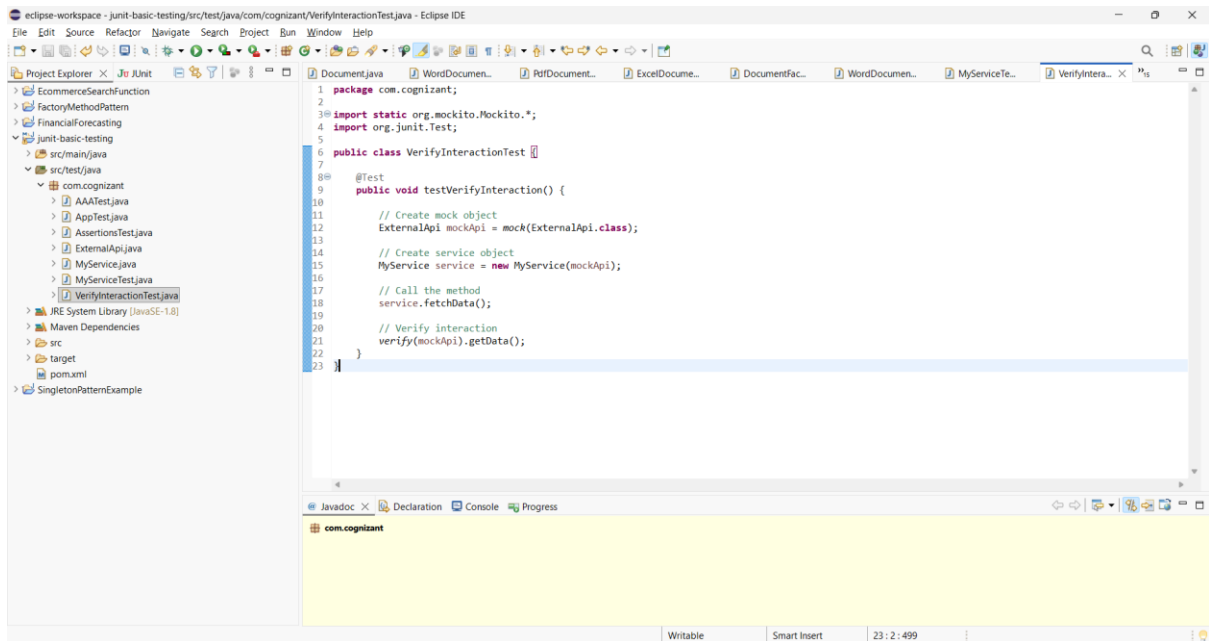

Created a new JUnit test class named VerifyInteractionTest inside the com.cognizant package.

COGNIZANT DIGITAL NURTURE 5.0 – JAVA FSE

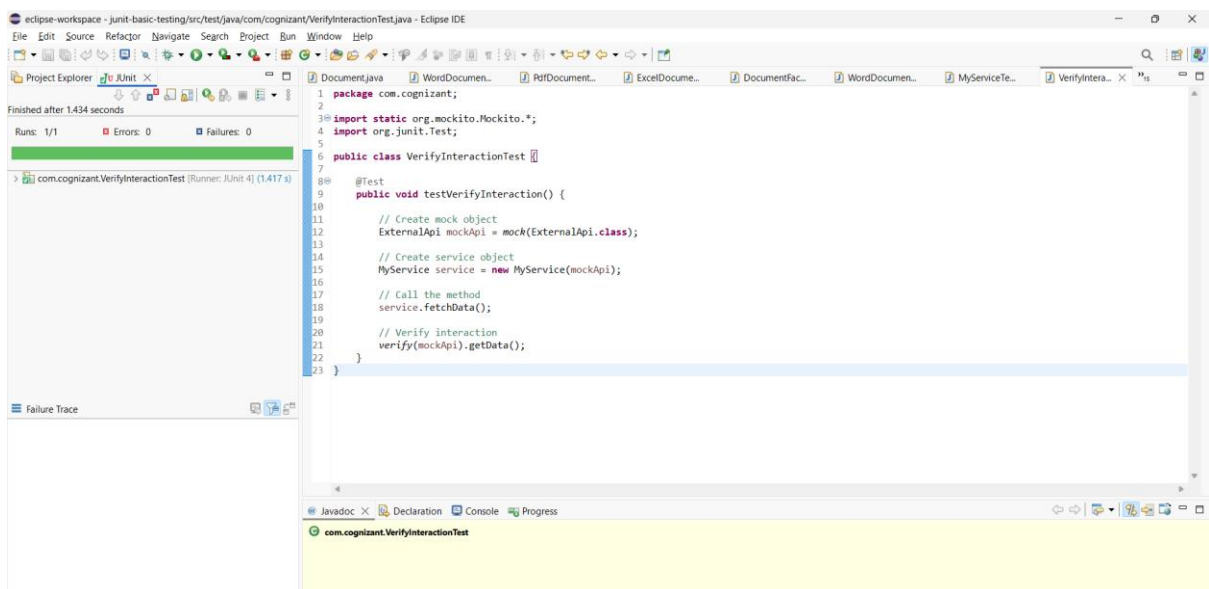

Step 3: Write the Test Code

Implemented the Mockito verification test using the `verify()` method to ensure the mocked API method is called.

Step 4: Run the Test

Executed the test using **Run As** → **JUnit Test**. The JUnit test executed successfully with no errors or failures.

COGNIZANT DIGITAL NURTURE 5.0 – JAVA FSE

Conclusion: Successfully verified the interaction between the MyService class and the mocked ExternalApi object using Mockito's verify() method. The JUnit test executed successfully with Runs: 1/1, Errors: 0, Failures: 0.
