

Spring REST using Spring Boot 3

Hello World RESTful Web Service

Step 1: Open the Spring Project

Step 2: Add Spring Web Dependency

COGNIZANT DIGITAL NURTURE 5.0 – JAVA FSE

Step 3: Configure Port Number

Step 4: Create Controller Package

Step 5: Create HelloController.java

COGNIZANT DIGITAL NURTURE 5.0 – JAVA FSE

Step 6: Write the Controller Code

The screenshot shows the Eclipse IDE with the `com.cognizant.springlearn.controller.HelloController.java` file open. The code defines a REST controller with a `sayHello()` method that prints "Start" and "End" messages and returns "Hello World!".

```
1 package com.cognizant.springlearn.controller;
2
3 import org.springframework.web.bind.annotation.GetMapping;
4 import org.springframework.web.bind.annotation.RestController;
5
6 @RestController
7 public class HelloController {
8
9     @GetMapping("/hello")
10    public String sayHello() {
11
12        System.out.println("Start");
13
14        String message = "Hello World!";
15
16        System.out.println("End");
17
18        return message;
19    }
20 }
```

Step 7: Run the Application

The screenshot shows the Eclipse IDE with the `com.cognizant.springlearn.SpringLearnApplication.java` file open. The code defines the main application class with a `main()` method that runs the application. The console output shows the application starting successfully on port 8083.

```
1 package com.cognizant.springlearn;
2
3 import org.springframework.boot.SpringApplication;
4 import org.springframework.boot.autoconfigure.SpringBootApplication;
5
6 @SpringBootApplication
7 public class SpringLearnApplication {
8
9     public static void main(String[] args) {
10        SpringApplication.run(SpringLearnApplication.class, args);
11    }
12 }
```

Console Output:

```
SpringLearnApplication [Java Application] C:\Users\aryan\p2\pool\plugins\org.eclipse.jdt.launcher\org.eclipse.jdt.launcher.exe (06-Jul-2026, 3:14:08 pm elapsed 22:58:31) [pid: 4672]

Step 8: Check Eclipse Console

The screenshot shows the Eclipse IDE with the `com.cognizant.springlearn.SpringLearnApplication.java` file open. The code defines the main application class with a `main()` method that runs the application. The console output shows the application starting successfully on port 8083.

```
1 package com.cognizant.springlearn;
2
3 import org.springframework.boot.SpringApplication;
4 import org.springframework.boot.autoconfigure.SpringBootApplication;
5
6 @SpringBootApplication
7 public class SpringLearnApplication {
8
9     public static void main(String[] args) {
10        SpringApplication.run(SpringLearnApplication.class, args);
11    }
12 }
```

Console Output:

```
SpringLearnApplication [Java Application] C:\Users\aryan\p2\pool\plugins\org.eclipse.jdt.launcher\org.eclipse.jdt.launcher.exe (07-Jul-2026, 2:28:18 pm elapsed 00:13:33) [pid: 15280]
